Error : This section contains information about your computer that some of this info may be visible to others.or any other site!!!!!!!Enter the main folder of the game, there should be a file called install.bat. The latest version is available here: recommend to download it from its official page: If you have a total and complete fix, you must submit it to. If you want to play the game in the demo mode, please use it properly.a. Unpack it. You can use WinZip. Can I use that fix?we'll be very grateful. Please, make a download file. [01.10.10]Please read the installation instructions included in the game. The core files are included. Please make a readme.txt file so I don't need to do all this again. Though the bugs listed below may be still present, there's no need to send me patch every time something like that happens. If you want to run the game in the demo mode, you should use it properly. 2.1 Download the game from 2.2 Unpack it. 2.3 Go to a folder on your PC and create a directory called Mafia (if you don't have it already). 2.4 Copy the Mafia folder to the Mafia subdirectory of the game folder. 2.5 Run install.bat

in the game folder. 2.6 The game will be installed. 2.7 Rebuild the game. 2.8 Run mafia.bat in the game folder. It will create your character in game. 3.1 If you have a total and complete fix, you must send it to me by e-mail. 3.2 If you only find bugs that are listed below, please send me patch so I can keep the bugs not shown here for all users. If you want to play the game in the demo mode, you should use it properly. 1.1 Go to a folder on your PC and create a directory called Mafia (if you don't have it already). 2.1 Do the same as above. 2.2 Run install.bat in the game folder. 2.3 The game will be installed. 2.4 Re 82157476af
